North Central Florida's Bioscience Hub

is centered in Progress Corporate Park, Alachua, near the University of Florida

Big news! MindTree is coming to town. See their announcement video here.

Go

Experienced

Most area bioscience companies started life here. Our relationships, services, facilities and equipment reduce cost and time to market. Our flexible terms reduce risk. Everything we do starts with a simple question, "What can we do to help you succeed?"

Specialized

Our unique complex with labs, offices, vivariums, greenhouses, fermenters and extensive shared scientific and business equipment help you launch quickly and affordably.

Sid Martin
Biotech Incubator
brochure

Successful

Our companies have attracted more than *half a billion dollars* in investment, contracts and grants. The vibrant, biotech community in Progress Corporate Park can help you succeed. Bio-workforce training and biopharmaceutical manufacturing is located nearby.

A CEO Reflects

"Starting in the Incubator, with access to important scientific equipment and expertise, allowed AGTC to meet significant early milestones so we could raise the funds needed to enter clinical development. We believe our current success is due to the firm foundation we established while part of the Sid Martin Incubator program."
